SKILLS

Technical Skills	JavaScript, TypeScript, React, Node.js, Express.js, PostgreSQL, ElephantSQL, EJS, HTML, CSS, Bootstrap, Git
Applications	Visual Studio Code, Beekeeper Studio

PROJECTS

Beauti Bodega | github.com/sharnee/beautibodega-v0
- Beauti Bodega is a mobile first shopping application targeted towards companies who sell beauty products, as well as their customers. The application features a login, register, profile, products, brands, a cart and admin pages. Brand Admins may edit or add to their brand or products connected to their brand.
- The project was built with TypeScript, React and Express for our frontend and backend. We used Firebase our image database and used Sequelize and ElephantSQL for all other data. All passwords are secured using Passport.js and Bcrypt.

Along the Way | github.com/scheltemat/front-end-project

- A web-based travel guide application that utilizes Google and weather API to calculate a route, find restaurants and forecast the climate conditions.
- Developed using JavaScript, HTML and CSS, and leverages the Google Maps, Places and Geocaching APIs.

Draw Dot | github.com/thomasZimmerman0/backend-project-obtuse-triangle

- A simple web based portfolio management application that allows users to create and upload drawings to a secure profile with related contacts.
- This application utilizes JavaScript, CSS, and HTML for the drawing and portfolio functionality and a PostgreSQL database to perform CRUD operations. Account passwords are secured using Passport.js and Bcrypt encryption.

EDUCATION

Digital Crafts	Web Development Bootcamp	July 7, 2022 - October 25, 2022
